

Leading the Numicon Intervention Programme (2 day course)

Course overview

This 2 day course is for Headteachers, SENCos, Subject Leaders and Local Authority Maths or Learning Support Teams. Upon successful completion of the course, delegates will be accredited to facilitate onsite training for support staff and teachers in their own settings.

What is NIP?

- The Numicon Intervention Programme has been developed to support Every Child Counts but is applicable to any school interested in maths intervention for 6-11 year olds;
- The Intervention lasts 12 weeks, with 2 or 3 lessons a week, depending upon pupil's needs.

The Numicon Intervention Programme is designed to be conducted by trained TAs and a

- supporting teacher;
- Training is provided either by:
 - Headteachers, Deputy Headteachers, Assistant Headteachers, Maths Subject Leaders accredited to facilitate onsite training for support staff and teachers in their schools – having successfully completed this training
 - Numicon consultants

"I left the course knowing exactly what I am aiming to put in place and have a clear plan of how to go about implementing this."

Class Teacher, Durham

Venue

Knowle Primary

OXFORD

What will the sessions cover?

This training focuses specifically on the materials needed to carry out the Numicon Intervention Programme including diagnostic assessment. We introduce you to resources for developing mathematical understanding and further develop your understanding of intervention and how our resources best meet the needs of individual children and whole schools, through a rigorous and proven intervention.

Having completed this training, you will be able to carry out the Numicon Intervention Programme and/or assist support teachers or teaching assistants within your setting with the implementation of the programme. We will support and facilitate you to carry out live training in your setting or to effectively facilitate the intervention with individual and small groups of children. You will feel confident in the on line resources, assessment, and practical resources working closely with other practitioners and school leaders ensuring the best possible start in mathematics education for all children.
